

### What Man Really wants

Now some men in order to get the things they need go to drastic means to acquire these things, such as ~~robbery~~ robbery and even murder this is brought about by man's want of power and also by the thoughts of what he wants. But when he has to stoop below his level to get these things he really doesn't need them.

These things that man thinks he wants lead to war, unhappiness and barbarism, we all know this is true because it is happening right here in our present day, right in front of our eyes, we see it in our own countries through politicians and racketeers who think money can buy anything and if it can't they have other means to see that their every wish will come to be. They never think about the other fellow, and if the other fellow or little man gets in their way it will just be too bad.

These men are the ones who are dragging our civilization down, and until finally we will be in such a poor state that we will never recover. It will be just like a depression that is what we should call these so-called men who let nothing stand in their way, their ~~own~~ middle names should be Depressions. But we can and must defend ourselves against such times & we must defeat it when it comes. We must follow in the footsteps of our grandparents, not lag back and say, "Let the other fellow do it all." That is what I mean when I say we will have ~~men~~ men who will stand up and fight that will be our leaders, just as an army has its commander we also shall have one. Our banner <sup>with</sup> will be <sup>to</sup> have <sup>as its</sup> slogan <sup>that is</sup> "Onward & Upward. Onward to better Christian lives. Onward to God."

Our catholic tradition tells man what he wants & not what he thinks he wants, we are catholic we live ~~with~~ with our friends who are catholic we know what is expected of us. This is what makes a man happy who knows what he is supposed to do and he does it no matter how hard it is. And after he has done it he looks back and sees what a wonderful job he has done <sup>and</sup> it makes him feel as if he ~~is~~ has done what God wanted him to do & with this thought he will go on to greater things that is how we acquire happiness by doing the things <sup>that we really want to do</sup> ~~that we really want to do~~ <sup>that we should do</sup>.

We as Catholics should know what we are supposed to do, we have the true religion and with the great honor bestowed upon us we should strive to make our religion the one and only, we can only do this by our loyalty & by the very act of acquiring happiness and peace. We are supposed to be the best people in the world people look up to us for instructions and if we do wrong they do it to and say, "Well if a catholic can do it I guess we can. If we would live up to God's way and really

make something of our lives we would enlighten the world and  
before long we ourselves would become individual Catholic leaders.  
We all know how a little boy will do what his mother does & if  
she does something bad he'll say, "My momma did it." We are in  
the Mother school because we call our church "Holy Mother Church"  
& if people on the outside see us do wrong they will keep on doing  
wrong things to. This way we would never progress and become masters of the Delights  
Peace, Unity or Happiness.<sup>619</sup>

While if we do the opposite and do good in our work and action people will  
say, "Aren't those Catholics just the perfect ones. Then they will try to do what  
we do. And if ~~it~~ would be temporary Catholic leadership it will be that way  
someday & when it comes we will say, "I helped in making this so, and  
then you can get yourselves on the back and say, "I guess they know who's  
right now. But we mean't forget our purpose, that is, we must remember  
we are only leader and not the Captain. we are only his lieutenant and if we  
feel as if we should be the whole show you'll soon find yourself in the shoes of  
the war-monger. We will first have to learn to take order and some  
day when our Catholic leader comes we will be able to give some of the order & help out so  
that our citizens, our delicts will come through in life.

As I said before ~~the~~ ~~the~~ ~~the~~ peace, unity & happiness would be brought about by  
Catholic leaders and they will come from our future Catholic schools students  
who go there now will become educated and they will see all the grief in our  
present world and they will soon find an answer to these problems.<sup>897</sup>
